## **DSK | Dewing Schmid Kearns Announces the Appointment of Tom Kearns to President**

Tom Kearns

We are pleased to announce the appointment of Tom Kearns to president of DSK | Dewing Schmid Kearns, Architects + Planners, Concord and South Dartmouth, MA. Tom's appointment reflects the broadening of our firm's vision and diversity of our practice. Founders Chip Dewing and Mark Schmid, together with Tom, form the firm's Board of Directors. Over the past thirty years, we have focused on the design of beautiful residential, public, and work spaces. Today, our practice includes planning and design for major education and healthcare institutions.

DSK has been enriched by the addition of new team members over the past year. Jim Newton, Senior Planner, leads our planning practice, working with clients such as Rhode Island School of Design and the Town of Bedford. Emilie Tucker joined DSK as Director of Interior Design working with several residential clients and Concord's Saltbox Kitchen. Ben Herter and Brian LaBau joined the firm as Project Managers working with Concord Academy and several residential clients. Kara Simard and Doug Breuer joined the firm as architectural designers. Damon May joined the firm as Senior Architect and is based in our South Dartmouth office.

As a firm, we are united by a pride in our work and commitment to thoughtful, beautifully crafted, and timeless design at all project scales. This year brings new opportunities for learning and creative design approaches for the firm. Our Summer Star project, a non-profit wildlife sanctuary in Boylston, MA, is an environmentally conscious complex with a unique structure. The project has added great depth to our green design expertise. In addition, we have been confronted with new coastal regulations with several projects that are underway this year. The "Colonel Willie Cove House," a residential project on the coast of Rhode Island, has presented DSK with an opportunity to advance our knowledge of contemporary coastal design. The Pilot House, a corporate office building on Boston's Lewis Wharf, provides our team with an opportunity to revitalize a beloved historic Boston building.

At DSK, we are proud to be contributors to the communities that we inhabit. Please visit [www.dskap.com](http://www.dskap.com) to learn more about the firm and our range of projects.
